Basic information

FSKL (Faculty for Traffic, Communication and Logistics Budva), is the only faculty in this field established in Montenegro in 2008.

CORE ACTIVITIES:

1. Education of engineers in traffic, electronic communications and logistics (bachelor and master) based on state-of-the-art knowledge (theory and practice) in the field of road traffic and safety, rail, air and postal traffic, electronic communications and logistics.
2. Scientific research activities through studies, projects, expertise, consulting services, etc.

Duration of the studies

At FSKL, the basic academic studies last for three years or six semesters, the master studies last two years or four semesters.

Leading professors from the country and the region, provide teaching in the relevant fields of the Faculty.

Accreditation, licenses, evaluation

FSKL works within the Adriatic University, Bar –AUB. FSKL is accredited and licensed educational institution.

The European Union Association of Universities (EUA) has conducted a positive evaluation of the FSKL under the Institutional Evaluation Program (IEP).

FSKL is licensed to carry out scientific research activities.

FSKL is licensed certified test center for ECDL with the right for training, testing and issuing of ECDL certificates adopted by the EU and UN, valid in 148 countries.

It has modern laboratory for the road traffic safety equipped from the ERASMUS+ (TRAFSAF project).
